

TRUCKERS' RESOURCE FAIR & Clean Trucks Update

For All Independent Truckers Serving Port of Seattle Cargo Terminals

- ◆ Get the latest on the Port's Clean Trucks Program.
- ◆ Learn about the Puget Sound Clean Air Agency's truck buy-back program and related truck replacement options.
- ◆ Meet company representatives and learn about resources available to help truckers with financing, insurance, health care, and training!

This is an important meeting for any Port drayage truck owner with a rig whose engine is older than 1994. Beginning January 1, 2011, trucks that serve Port of Seattle container terminals must have engines from 1994 or later for access to Port terminals. The Puget Sound Clean Air Agency is launching a buy-back and scrap program for pre-1994-engine trucks, along with a program to offer newer replacement trucks at great financing terms. Come learn about this new program and meet representatives from organizations with resources to help Port truckers!
