

1.02 AUTHORIZATION, APPLICABILITY AND USE

This Signage Standards Manual has been developed by STIA Facilities and Infrastructure with input from the Landside and Air Terminal Lines of Business; Project Management Group, including design consultants working on the Roadway Signage Upgrade, Terminal Signage Upgrade, STEP, and Central Terminal Projects; and Port of Seattle Public Affairs, Information Technology, and Maintenance.

All airport signs, including those installed temporarily during Port construction or tenant improvements, directional, roadway, concession, and tenant signage, shall be fabricated and installed as described herein.

All airport construction projects, tenant improvements, and tenants having a long- or short-term lease or operating agreement with the Port of Seattle at STIA, and all Port of Seattle departments involved in signage of any nature at the airport, shall be subject to the standards and regulations herein.
