

**MOTION
OF THE PORT OF SEATTLE COMMISSION
DIRECTING CREATION OF A SEA-TAC AIRPORT
COMMUNITY ECOLOGY FUND**

**ADOPTED
NOVEMBER 22, 2016**

TEXT OF THE MOTION

The Port Commission hereby directs the creation of an Airport Community Ecology Fund to support projects and programs in Sea-Tac Airport-area communities to improve ecological and environmental attributes in airport-area communities. A sum of \$1 million shall be allocated to the Airport Community Ecology Fund.

STATEMENT IN SUPPORT OF THE MOTION

The Port of Seattle is committed to fulfilling its responsibilities to ensure the safety of flight and compliance with all FAA regulations at Seattle-Tacoma International Airport. At the same time, the Port recognizes the impacts of airport operations on SeaTac, Des Moines, Burien, and other communities.

The Port Commission has received substantial public input and comment concerning the Flight Corridor Safety Program, under which the Port will remove and replace trees and other obstructions to navigable airspace to meet regulatory requirements and continue necessary airport operations. This program, while essential, has resulted in concerns from citizens about impacts on the environment and quality of life in their communities. Trees are important to preserving air quality and screening airport activity.

Recognizing these comments, and the Port's interest in supporting strong and healthy communities, the Port should establish an Airport Community Ecology fund available to the citizens and communities of SeaTac, Burien, and Des Moines to improve ecological attributes in cities affected by airport operations. The Fund will be provided with \$1 million.

Specific environmental opportunities such as tree planting and projects to be funded by this program shall be identified through consultation and outreach to the affected communities. The activities will include, but not be limited to, support of Des Moines Memorial Way tree replacement program, tree planting in communities, cooperation with environmental education programs in local schools, joint efforts with local non-profit organizations, and other outreach activities.

Port staff is directed to develop procedures for engaging with the community to elicit proposals for funding and for selecting candidate projects. Projects selected should be apportioned fairly among the communities affected.

STATEMENT OF POLICY DIRECTION

Port staff is directed to create an Airport Community Ecology Fund to support environmental projects and programs in SeaTac, Burien, and Des Moines. The sum of \$1 million shall be provided for the Fund.

The staff is directed to consult with the Commission concerning the scoping and criteria related to project selection and outreach to the community. Staff will return to the Commission no later than the first quarter of 2017 with goals, eligibility for the fund, and criteria for the selection of proposals.
