

A&E / Contractor Info

Representatives of the firms on the attached list have gone through a Port of Seattle training session focused on how the design and construction process works for tenant projects at Seattle-Tacoma International Airport. This training session was held to increase awareness within the architectural, engineering and contractor community regarding the business opportunities and the processes associated with the Airport Dining and Retail Program redevelopment. The Port of Seattle does not endorse any of the companies on this list. It is provided only as a resource tool. Prospective tenants are not required to use firms on this list, but can select any design or construction company they choose.
