Cruise with the best.

Nine premier cruise lines departing from Seattle.

Here, we mean **green.**

At Cruise Seattle, we're proud to be the only cruise home port in North America with a voluntary clean water agreement between the Port, the cruise lines, and our regulators. That means, no discharge of wash water in Puget Sound and no discharge of exhaust water at berth. Beyond compliance, the Port works closely with the cruise industry to protect Puget Sound waters.

Shore power is our best opportunity to eliminate local air pollution from ships at berth, and significantly reduce climate impacts that come to our beautiful city. Seattle was the first home port in the world to provide two vessel berths with shore power connections and now plans to expand to additional berths.

The Port of Seattle intends to fulfill its responsibility to address climate change through forward-looking environmental policy and with continued focus on efficient and renewable energy.
