The Next Phase of FlyHealthy@SEA

Seattle-Tacoma International Airport (SEA) is committed to your health and well-being. The pandemic forced massive shifts in our lives. You can expect things to be different the next time you travel.

FlyHealthy@SEA is our layered, comprehensive action plan to ensure your health and well-being while traveling. We require face coverings and physical distancing, boosted cleaning and disinfecting activities, and added more touchless technologies.

Common Cold to COVID-19: FlyHealthy@SEA is Ready for Fall and Winter

As the seasons change this month, SEA is preparing for the fall and winter by doubling down on disinfecting. At the beginning of COVID-19, we escalated an already-robust cleaning program to ensure frequent disinfection with medical-grade and EPA approved cleaning products. We added an emphasis on high-touch areas such as buttons, handrails, and counters.

And that was just the beginning. SEA continues to add new and better solutions for cleaning.

This week we announced six clean tech strategies you will see at our airport, including autonomous floor cleaning machines, electrostatic sprayers, and cleaning systems that disinfect escalator hand railings.

Keep reading.
Travel in a New Normal

The next time you visit SEA, your experience will look and feel different, including:

- Face coverings or masks are required
- Signage for reminders and spacing to honor physical distancing
- Plastic protective barriers that buffer interactions between travelers and airport employees
- Frequent disinfection with medical-grade cleaning products
- Added over 280 hand sanitizer stations throughout the terminal for your use. Download the SEA App with our interactive map of hand sanitizer locations.
- Each dining and retail tenant at SEA developed plans detailing procedures for safe operations such as physical distancing requirements, sanitation and personal hygiene protocols, personal protective equipment, and how to provide services while limiting close interactions.

FlyHealthy@SEA will continue to evolve as travelers return to the airport.

Help Stop the Spread – Passenger Actions

Passengers, employees, and the community can help stop the spread of COVID-19. We ask you to follow these guidelines to protect yourself, your fellow travelers and airport employees, including:

- Avoid non-essential travel
- Stay home when you are sick. And get better soon!
- Wear face coverings to help slow the spread of germs
- Practice physical distancing
  - Maintain your distance and stay six feet (or two meters) apart from others
  - No more than four in an elevator
  - Using every fourth step on escalators
- Wash your hands often with soap and water for at least 20 seconds
- Avoid touching your eyes, nose, and mouth

In case you missed it!

FlyHealthy@SEA Action Plan

In April 2020 we launched FlyHealthy@SEA, a multi-layered strategy to ensure the safety and well-being of the traveling public and airport workers. Initial actions included enhanced cleaning, physical distancing, communication and partner collaboration. Compliance in our face covering or mask requirement is at over 90 percent. The FlyHealthy@SEA Action Plan details the airport’s actions to protect you now and the work underway for the next phase of traveling safely in our new normal. The program continues to evolve as travelers return to the airport. We are ready for you when you’re ready to travel.
