

DISCOVERY HEALTH

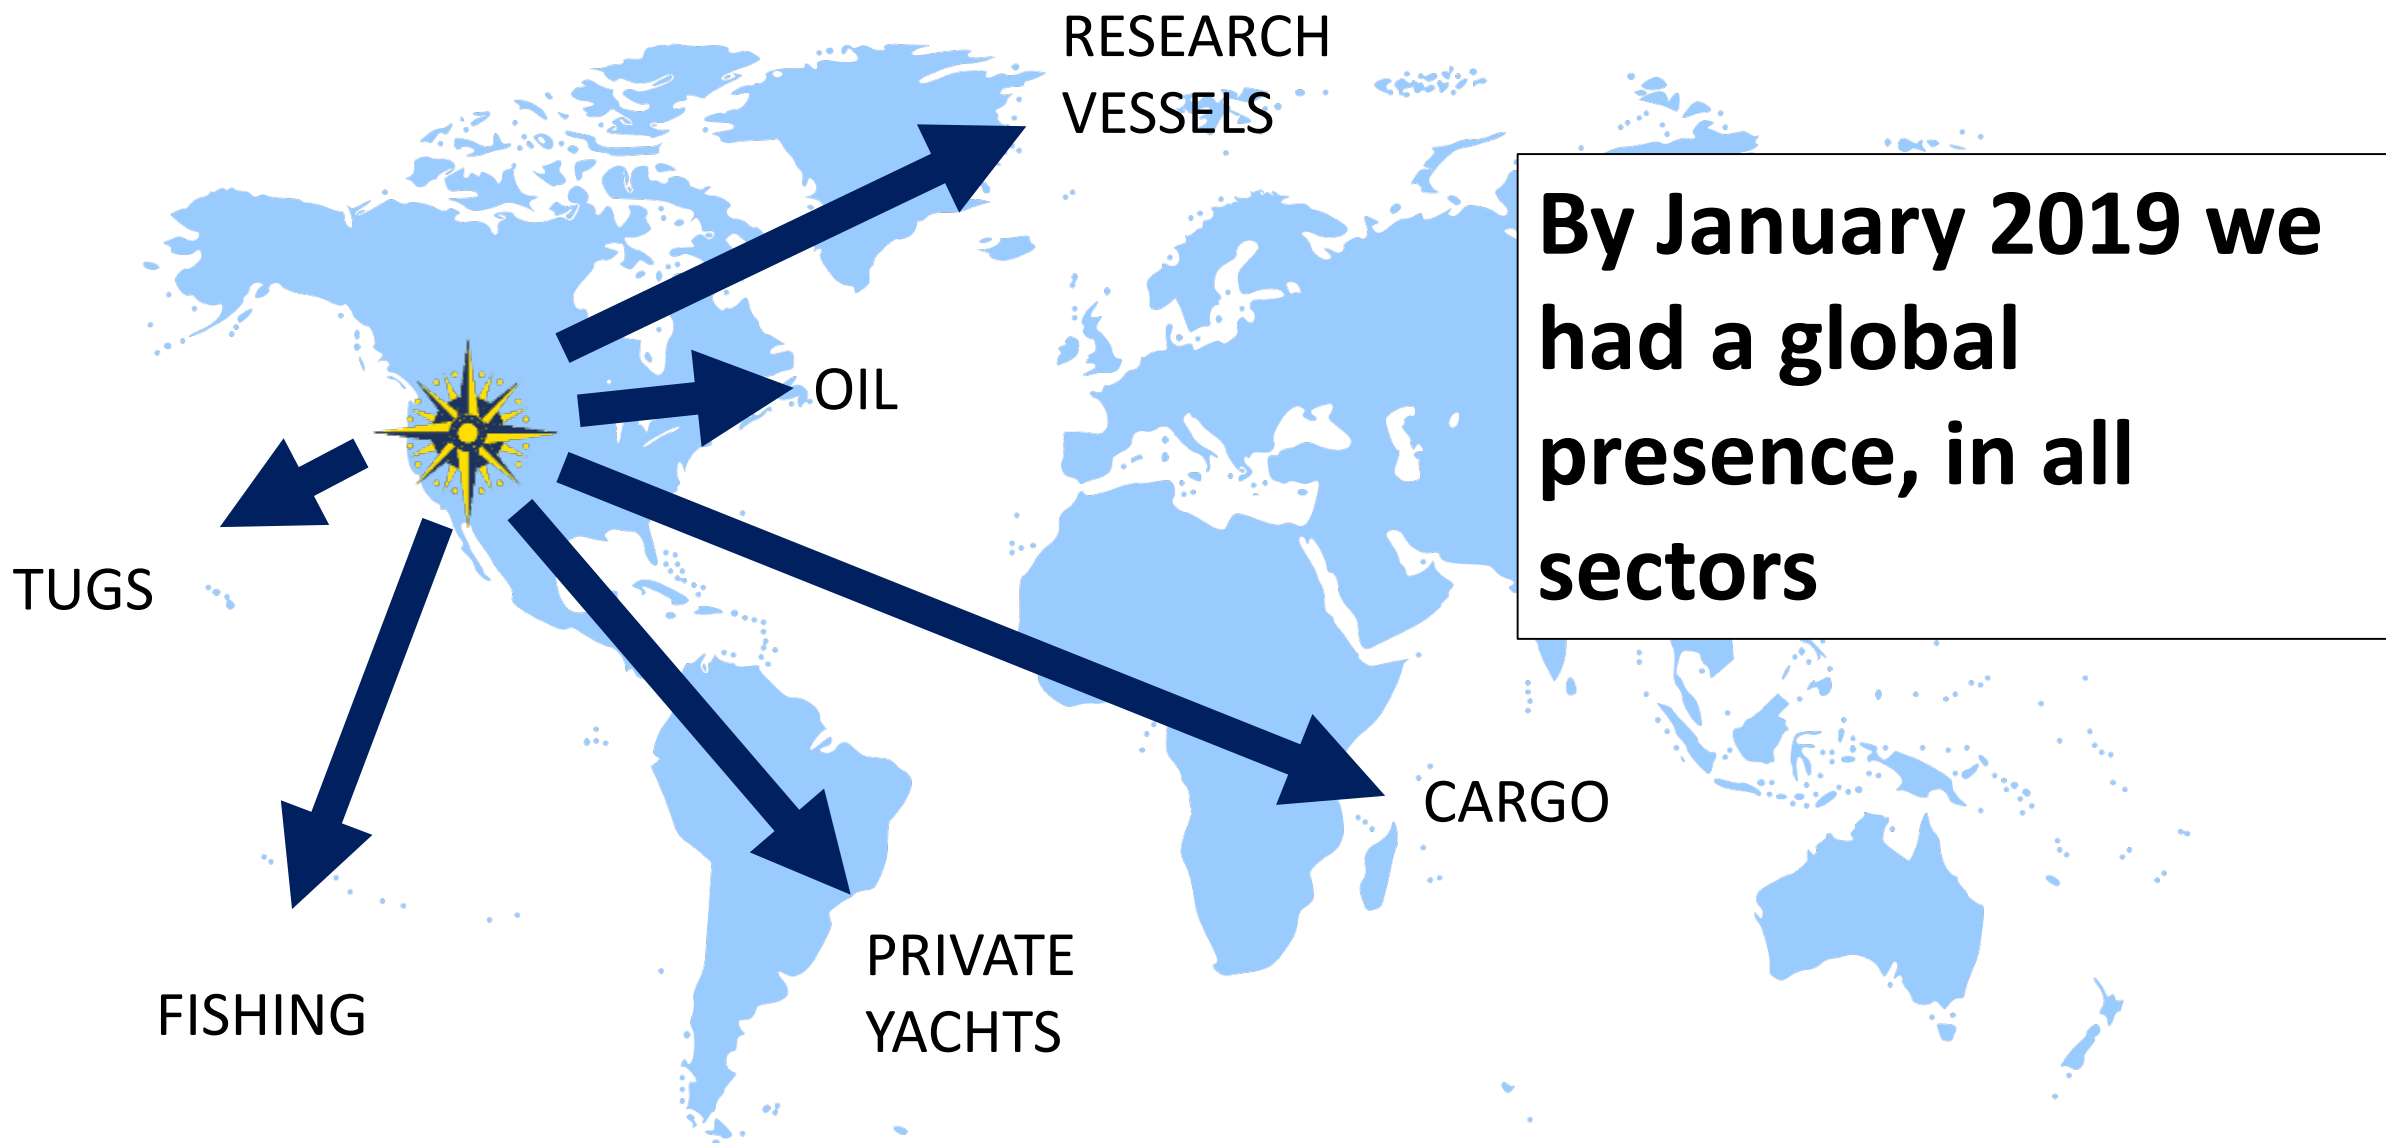

Our History

Founded in 2016 by Drs. Ray and Ann Jarris with the mission to improve health at sea, Discovery Health MD was the vision of the late Ray Jarris, one of the pioneers of maritime medicine. Ray was medical director of the Swedish Ballard ER, and began taking medical calls from ships in the Bering Sea in the 1990s. The founder of Maritime Health Services and Global Health Systems, Ray knew we could do better to preserve the health and welfare of mariners. We are proud to be executing on his vision and legacy.

**We took on our first clients
in January 2017 in the
Washington and Bering
Sea fishing and cargo fleets**

Testimonials

While we are proud of the work we are doing, we know we can do more to improve health at sea.

“Crewmember says that this medical treatment was the quickest and simplest and best treatment he has ever had in his 30 years of going to sea. Personally, I attribute that to Dr. Ann Jarris and her team.”

Captain, Alaska Tanker Company

“Over the course of 30 years of Alaska fishing industry related work I have come to know various medical support services. The most outstanding for reliability, medical expertise and with local knowledge is by far Discovery Health.”

Risk Management, Trident Seafoods

“We discovered our captains were reaching out to Discovery Health three times more often than the previous provider. A brief survey indicated this was because the physicians were easier to understand and more relatable – they were immediately available, US trained, aware of the challenges of medical care at sea and willing to work with our captains.”

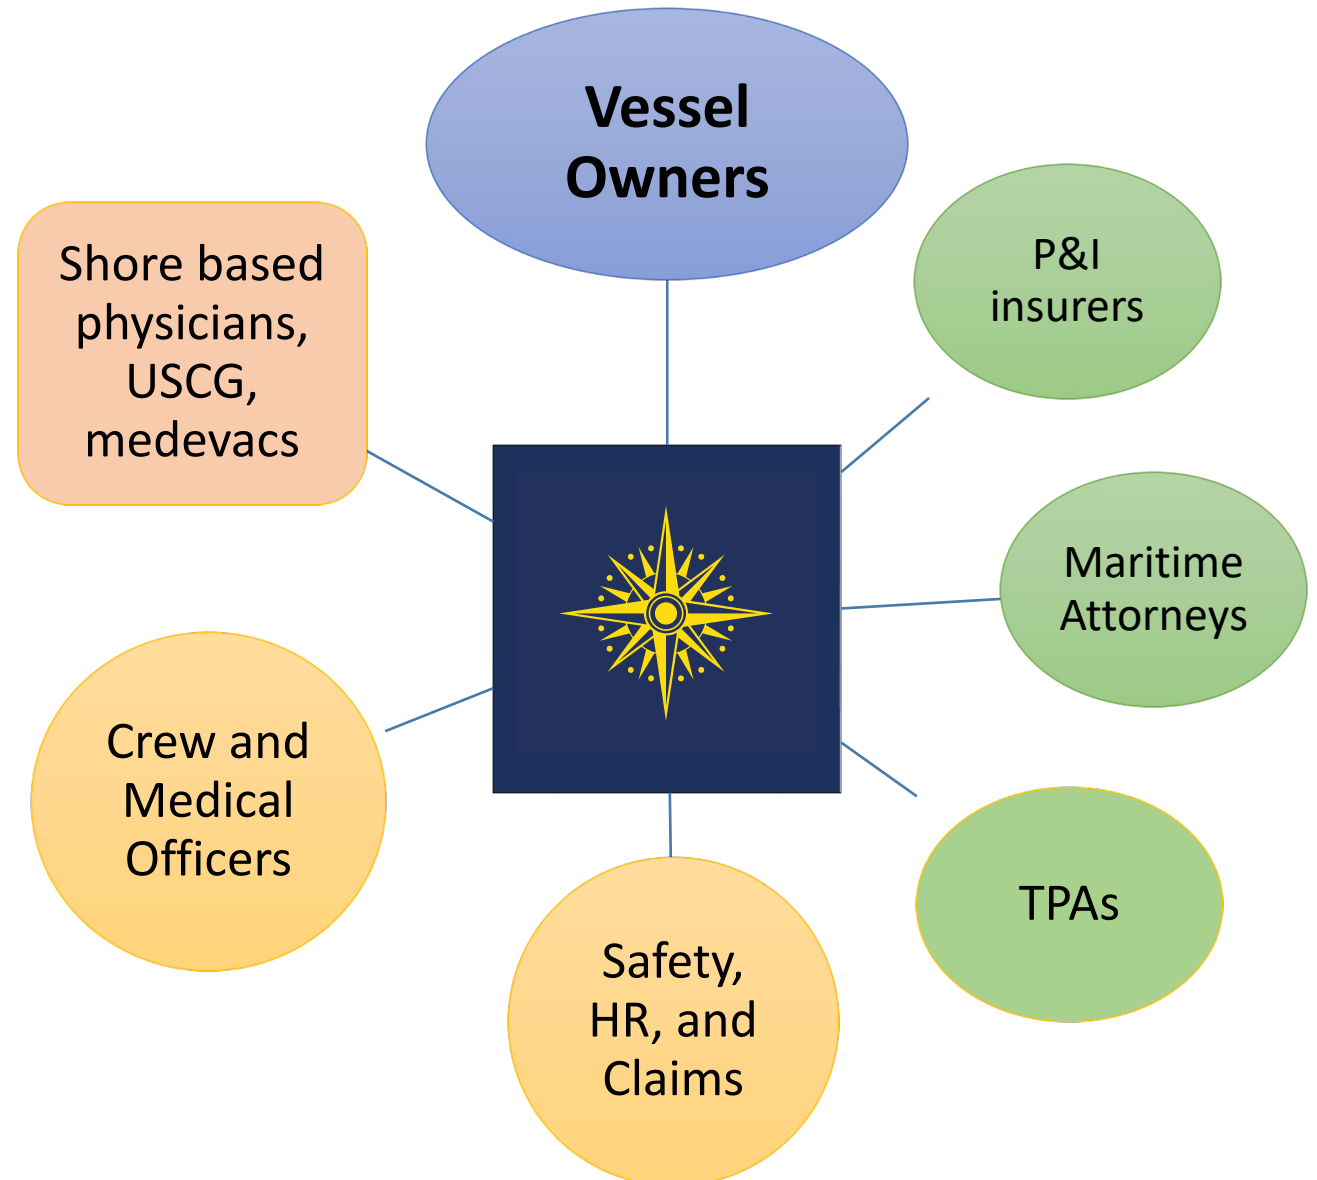

HSQE, OSG Ship Management

Our Mission:
To Save Lives And Improve The Health
And Welfare Of All Mariners

Stakeholder Communication and Support

By focusing on the health and wellbeing of the crewmember, we are able to align all stakeholders interests. Providing immediate access to expert medical advice and logistics allows us to proactively manage health and reduce the risk of an event.

Discovery Health Product Lines

Our product lines cover every aspect of a mariner's health throughout his or her career. By integrating information across time, we can assist mariners in managing chronic disease and prolong careers.

Preparation & Prevention

- Respirator Screenings
- Pre-placement medical screenings
- Medical chest design – Flag state compliant
- Controlled substances management
- USCG medical credentialing assistance
- Medical Officer training

Event Management

- 24x7 physician advisory services
- Evacuation and diversion coordination

Post-Event Management

- Physician coordination
- Nurse case management

Current Medications, Allergies, and Immunizations

Do you take any medications? (including prescriptions, over the counter drugs, dietary supplements and herbal medications) *

Next

Through our online Fitness For Duty program, we are able to screen applicants, identify high-risk medical conditions, and assist mariners with finding health care resources to stabilize and manage chronic disease. We partner with low-cost and community clinics to assist those without health insurance.

Save

Our Value Proposition

— Sample Average Insurance Cost Per Crewmember Per Month

We save our clients money by proactively managing risk at every stage. Our comprehensive medical services break down the silos of health information to identify and mitigate high risk situations before an event occurs.
