This new project to improve ticketing and baggage areas in the airport’s north end officially launches when protective barricades and scaffolding start popping up in October. The first phase of construction will include the redevelopment of
the promenade level for much needed operational office space. The project adds Alaska Airlines check-in and bag drop on the Ticketing level and upgrades the architectural finishes throughout the Bag Claim level northern section.

This initial phase increases useful space for operations as well as passengers from curb to security. These updates will range from building systems and code upgrades, to life safety systems, to air handling and mechanical upgrades. These updates ensure the building is ready to sustain the next 50 years.

Visit general contractor Hensel Phelps’ website for ongoing bid opportunities.

C CONCOURSE EXPANSION

Not Your Typical "Groundbreaking"

Right now, the C Concourse Expansion project is preparing to install underground utilities and structural foundations for the new building. After saw cutting and removing some existing asphalt and concrete panels, crews will drive micropiles into the existing building footprint. The additional reinforcement will support four new floors of dining, retail, and work space.

Visit general contractor Turner Construction’s website for current open bid opportunities.
CONCOURSE A BUILDING EXPANSION FOR LOUNGES

Introducing 52,000 More Square Feet at SEA

Construction is starting this year on a project at the end of A Concourse, near Gate A11. Temporary construction barricades have been erected and Delta's construction contractor will soon begin work to expand the building to provide space for a new Delta Air Lines Sky Club lounge and expanded Club at SEA Lounge.

The project is part of a Tenant Reimbursement Agreement (TRA). Delta is constructing the new building shell and the interior buildout of their new Delta Sky Club, which will be their second lounge at SEA. After Delta’s construction is finished, a separate project will construct a new and larger Club at SEA inside the new building shell. This project is scheduled for completion in 2024.

WIDEN ARRIVALS ROADWAY

Bridge Demo Kicks Off Project Early Work
Crews demolished an unused roadway ramp to the airport parking garage this month to prepare for an upcoming project in 2023. The Widen Arrivals Roadway project will ease airport traffic congestion and improve access for ground transportation and airport parking.

The ramp originally supported valet parking, but has been closed since the Light Rail Transit began operations at SEA over 10 years ago. The demolition took place in the power of threes — three phases removing three different spans of the ramp during a three-week period. Construction happened overnight to minimize traffic congestion and impact. The next construction phase will kick off in late 2023.

CURBSIDE ACCESSIBILITY AND SAFETY

Front Door Changes
Start in October

RESTROOM RENOVATION

Project Opens
Another New Restroom
Upgrades to the literal front doors are coming through a series of accessibility and safety enhancements starting in October. Arrivals and Departures curbs will increase the number of accessible loading zones and make them easier to navigate. Bollards will also be installed on both drives as well as at the entrances to skybridges and along the courtesy vehicle plaza.

Welcome to the new front door →

The Restroom Renovation Project opened another brand-new restroom on the B Concourse by Gate B9. Larger stalls and upgraded finishes create a lighter and brighter space. Next in this phase of construction are new and updated restrooms across the hall near B8, at the C Concourse, and an all-gender restroom at the D Concourse.

CENTRAL TERMINAL

Grand Opening Inching Closer

Barricade removal will begin soon for the grand opening of the expanded American Express Centurion Lounge, the new Salty’s at the SEA, and BrewTop Social. These final two major upgrades will complete the Central Terminal Renovation Project.
