

# Approved Ground Deicers And Anti-icers

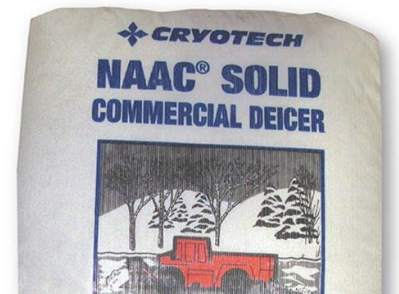

- ✓ Potassium acetate (E-36) - Liquid
- ✓ Sodium acetate (NAAC) - Pellet
- ✓ Calcium/Magnesium acetate (CMA) -Pellet

Please be advised: **chloride or ammonium** containing deicers are prohibited on the AOA, landside operations, and logistics laydown areas. The use of products containing urea is prohibited.

Contact Aviation Maintenance Field Crew at (206) 787-4490 if you need AOA sand.

## Roofing Anti-Icers

If anti-icing products other than Cryotech NAAC® will be used on the roofs, **the product data must be submitted** to your project resident engineer or property manager with documentation showing it has no adverse effects on PVC roof membrane.

Refer to the Seattle Tacoma International Airport Stormwater Pollution Prevention Plan for other de-icing and anti-icing requirements or contact Aviation Environmental at (206) 787-5525.
